TWIZY CARGO: A TWIZY FOR BUSINESS USERS!

The Twizy family is expanding with Twizy Cargo, a new version designed for carrying goods. A large boot and door make their appearance at the rear. Twizy Cargo is a new take on the smart, fun, go-anywhere all-electric LCV.

Twizy Cargo in brief:

- **A 180l / 75 kg boot, replacing the rear seat**
- **Stowage available from the rear using a lockable door**
- **Available with the Life 45 and 80 trim**
- **From €8,080 incl. VAT (Cargo 45) and €8,780 incl. VAT (Cargo) ***

Twizy, Europe's best selling electric vehicle, always turns heads. Its qualities are clear to business users, since 60% of buyers are companies. A highly driveable car, uniquely easy to use and with running costs of virtually zero, Twizy is the ideal companion for business users.

A new Twizy to go further...

Twizy Cargo is an eminently functional vehicle developed by Renault Tech in cooperation with Renault Sport Technologies. It has the huge advantage of a watertight boot with a capacity of 180l (75 kg), accessible via a rear door that opens to 90°. This conversion was made possible by adapting the cut-out of the rear end and doing away with the passenger seat. The front seat is still moveable, and the door features a locking system that works with the ignition key.

The ultimate urban vehicle and now an LCV, Twizy Cargo is aimed primarily at delivery or express firms, such as lift operators, postal services and emergency services. Highly visible, it can be fitted with decals and customized.

In terms of safety, this compact vehicle has features worthy of a conventional vehicle, with a protective cabin, 4-point seatbelt and airbag.

A full array of advantages

Since Twizy Cargo is a vehicle converted by Renault, buyers can claim back VAT on the purchasing price and battery rental (from €50 month). A decisive argument for companies. Also, buyers gain the same warranty coverage as for other Twizy versions (two years unlimited mileage for the car, three years for the powertrain).

Clever Twizy Cargo clearly has all the assets necessary for clean, easy, economical deliveries. Without forgetting its incomparable agility and capacity to park anywhere.

Technical characteristics

	TWIZY CARGO 45 LIFE MA L6e	TWIZY CARGO LIFE MB L7e
Type	Light quadricycle, limited to 45 kph	Heavy quadricycle, limited to 80 kph
